

Android

Android

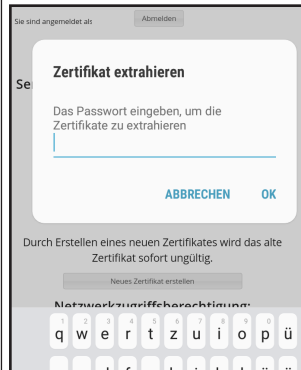

Up to and including step 6, please follow the instructions for iOS. (see back of manual)

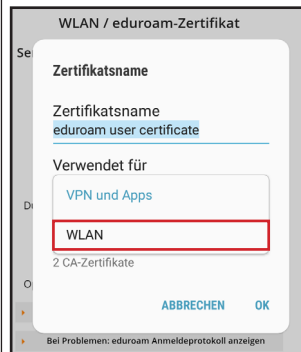

Step 7: Log in with your ZIM-username and password and download your certificate. If you are connecting to eduroam for the first time ever, choose **„Zertifikat erstellen“** and download it then.

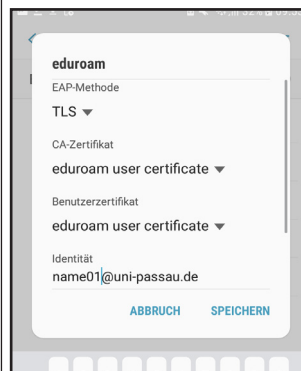

Step 8: Choose the file from the drop-down menu or from your download folder and install it.

Step 9: While installing, your phone will ask for your **„Passwort“**. Enter your **ZIM-username** (e.g. name01), **not your password**.

Step 10: When this pop-up appears, choose **„WLAN“** from the drop-down menu.

Step 11: Choose **„eduroam“** from the WiFi-menu. Open the network options and enter the **settings** like shown in the picture. As identity enter your ZIM-username like this **name01@uni-passau.de**.

Zentrum für Informationstechnologie und Medienmanagement

No WiFi? Don't worry. Here's how to get it.

Instructions for the WiFi-Installation for your Smartphone. (iOS and Android)

iOS

Step 1: Connect your phone to **CampusUniPassau**.

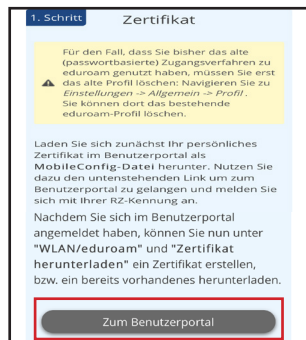

Step 2 (optional step): Do not log in, but choose the link **„Hier klicken zur Installation von Eduroam und VPN.“**

Step 3: Open **www.uni-passau.de/wifi**. Please scroll down and choose **„Student/Mitarbeiter“**.

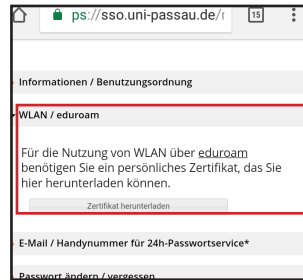

Step 4: After this, choose **„eduroam“**.

Step 5: You should click on **„Zum Benutzerportal“**. It will appear a new website.

iOS

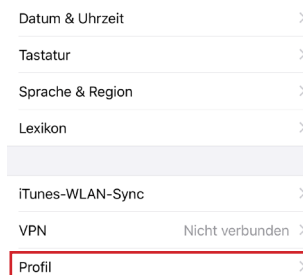

Step 6: Open your internet browser. Open **https://sso.uni-passau.de/meineerkennung/1** and choose **„WLAN“** and **„Zertifikat herunterladen“**

Step 7: Log in with your ZIM-username and password and download your **certificate for iOS**.

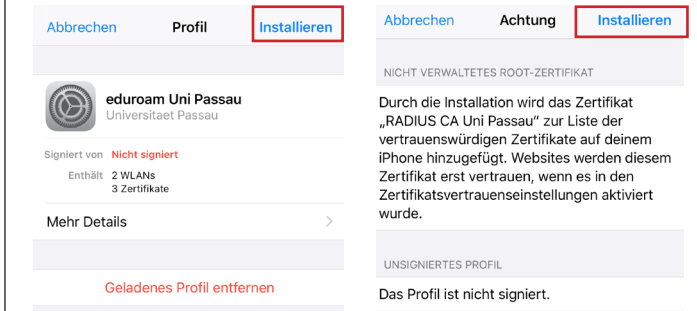

Step 8: If this pop-up appears, click on **„Zulassen“** and **„Schließen“**.

Step 9: Use your **settings** and choose **„Allgemein“** and then **„Profil“**.

iOS

Step 10: Choose the profile **„eduroam Uni Passau“** Click on **„Installieren“** twice.

Step 11: You have to use your **ZIM-username as a password (name01)**, not your password.

Step 12: The profile has been installed and you can click on the button **„Fertig“**.

Choose **„Automatisch verbinden“**. Now you can use both eduroam and eduroam 5 GHz.
